

EASYSeal **Porcelain Sealer**

Invisible long-lasting protection

3 litre ready-to-use bottle

Porcelain Sealer has been developed using short chain polymer technology and is a major advance in paving sealers.

Features & Benefits

Non film-forming hybrid technology which provides water and stain protection which is breathable and transparent. Suitable for internal and external use.

- A state-of-the-art formula designed to work with porcelain paving
- Invisible when dry
- Excellent repellent of oil, grease and water
- Superb anti-stain properties with a strong resistance to dirt, grime and water
- Restricts moss growth, algae and other natural contaminants
- Water based - safer to use whilst being hard wearing

APPLICATION: DO NOT DILUTE - USE NEAT AS SUPPLIED

- Coverage will vary depending on porosity of substrate.
 - SHAKE THE CONTAINER FOR 30 SECONDS BEFORE EACH USE
1. For best results, apply using a paint pad
 2. One coat is sufficient

IMPORTANT: remove pooling by mopping up excess product. Pooling left on the surface can result in a milky finish and reduce effectiveness.

Cleaning tools

Remove as much excess product as possible and clean tools and equipment immediately after use with soapy water.

Precautions

- **Always test a small hidden portion of the substrate before use, to ensure the final result is satisfactory and to calculate consumption**
- Surface should be clean, dry and free from dirt, soiling, mould and algae before applying
- Ideal application temperature should be between 10°C and 25°C
- Do not apply during rain, frost or when surface and air temperature is below 5°C
- Do not apply to hot surfaces in direct sunlight
- Do not apply if rain is expected within 24 hours

Curing

Water repellence and stain resistance is evident after initial curing but may take up to 7 days to reach 100% performance.

NOTE: Coverage depends on the porosity of the surface and its texture. If the surface is particularly uneven or particularly porous, more liquid will be used.

IMPORTANT / LIMITATIONS

Porcelain Sealer must not be used on glazed tiles or other completely non-porous surfaces. Check for water absorption before use.

Storage

- Store in dry conditions above 5°C and below 30°C
- Store in a cool, well ventilated area
- Keep container tightly closed
- Keep out of direct sunlight and protect from frost in original container
- Keep out of reach of children

Health & Safety

- Do not get in eyes, on skin, or on clothing
- Wear protective gloves, protective clothing, eye protection/ face protection
- **IF ON SKIN:** Gently wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. If skin irritation or rash occurs seek medical advice/attention
- **IF IN EYES:** Bathe the eye with running water for 15 minutes. Promptly wash eyes with plenty of water while lifting the eye lids. Continue to rinse for at least 15 minutes and get medical attention. Remove contact lenses if possible and safe to do so
- **IF SWALLOWED:** Rinse mouth. Do NOT induce vomiting. Wash out mouth with water. If conscious, give half a litre of water to drink immediately. Transfer to hospital as soon as possible
- **IF INHALED:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. If feeling unwell, call for medical assistance
